

1. WAP to print two numbers x and y.

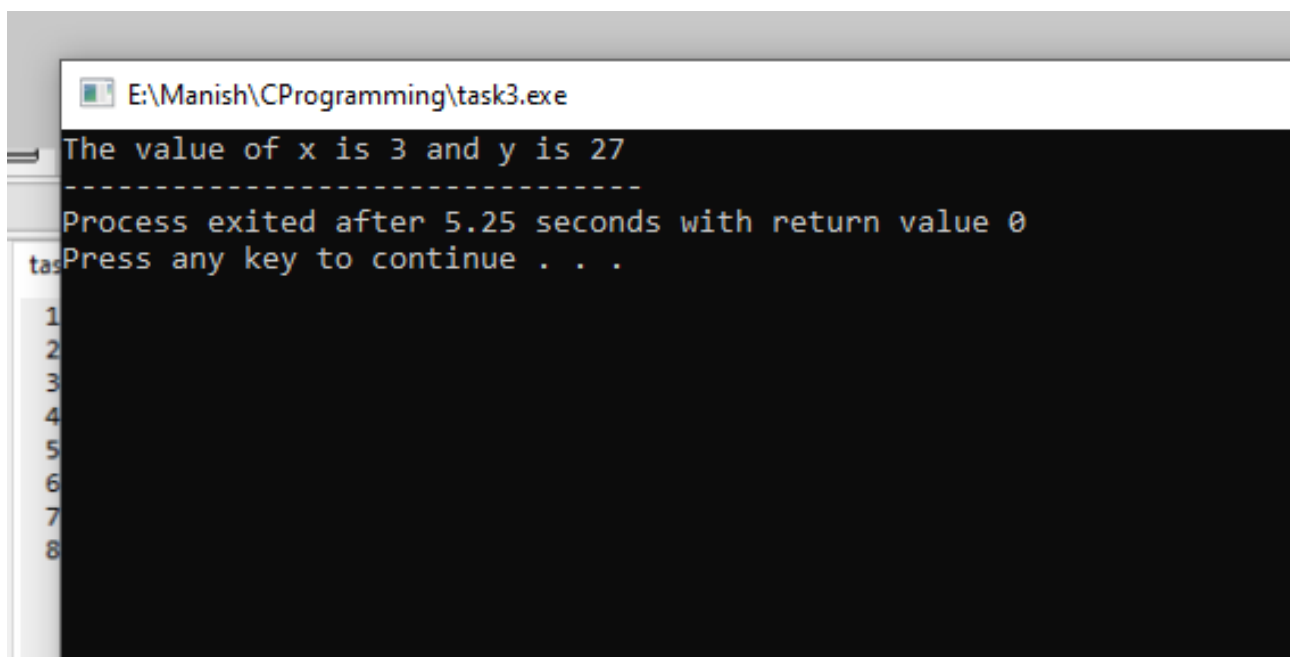

Source Code:

The screenshot shows a code editor window titled 'task3.c' with a 'Debug' tab selected. The code is as follows:

```
1 //1. WAP to print two numbers x and y.
2 #include <stdio.h>
3 int main()
4 {
5     int x = 3, y = 27;
6     printf("The value of x is %d and y is %d", x, y);
7     return 0;
8 }
```

Output:

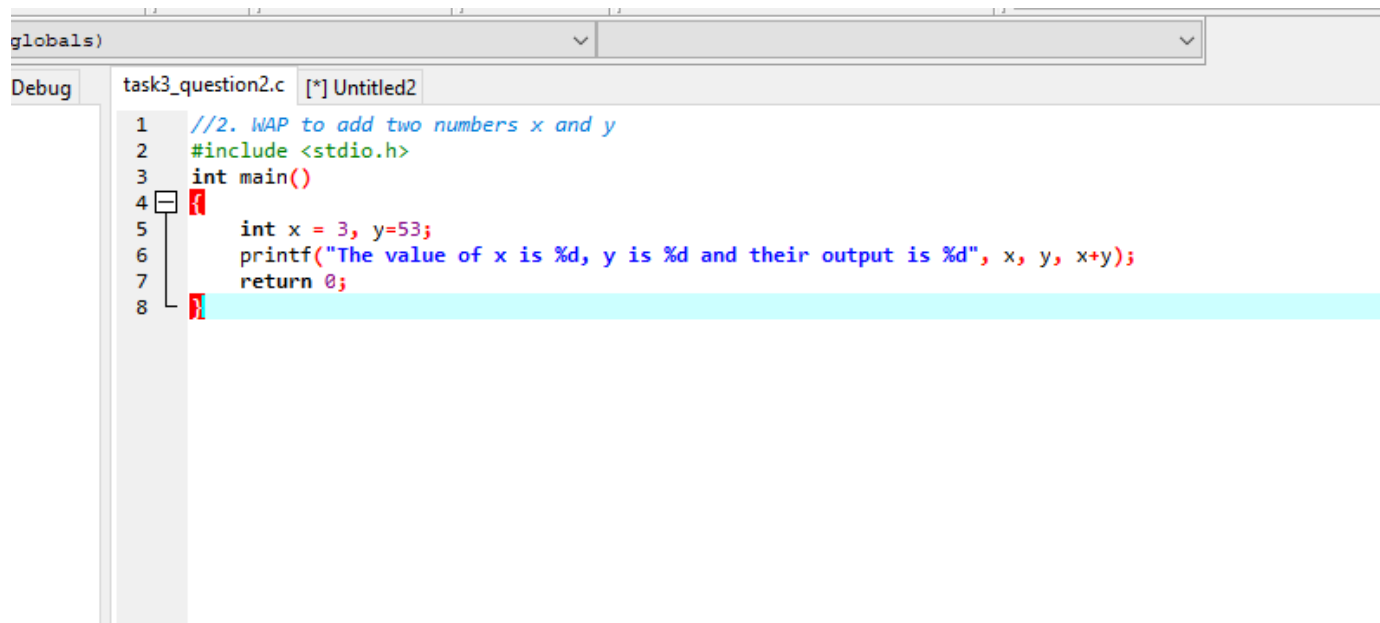

The screenshot shows a console window titled 'E:\Manish\CProgramming\task3.exe'. The output is as follows:

```
The value of x is 3 and y is 27
-----
Process exited after 5.25 seconds with return value 0
Press any key to continue . . .
```

2. WAP to add two numbers x and y.

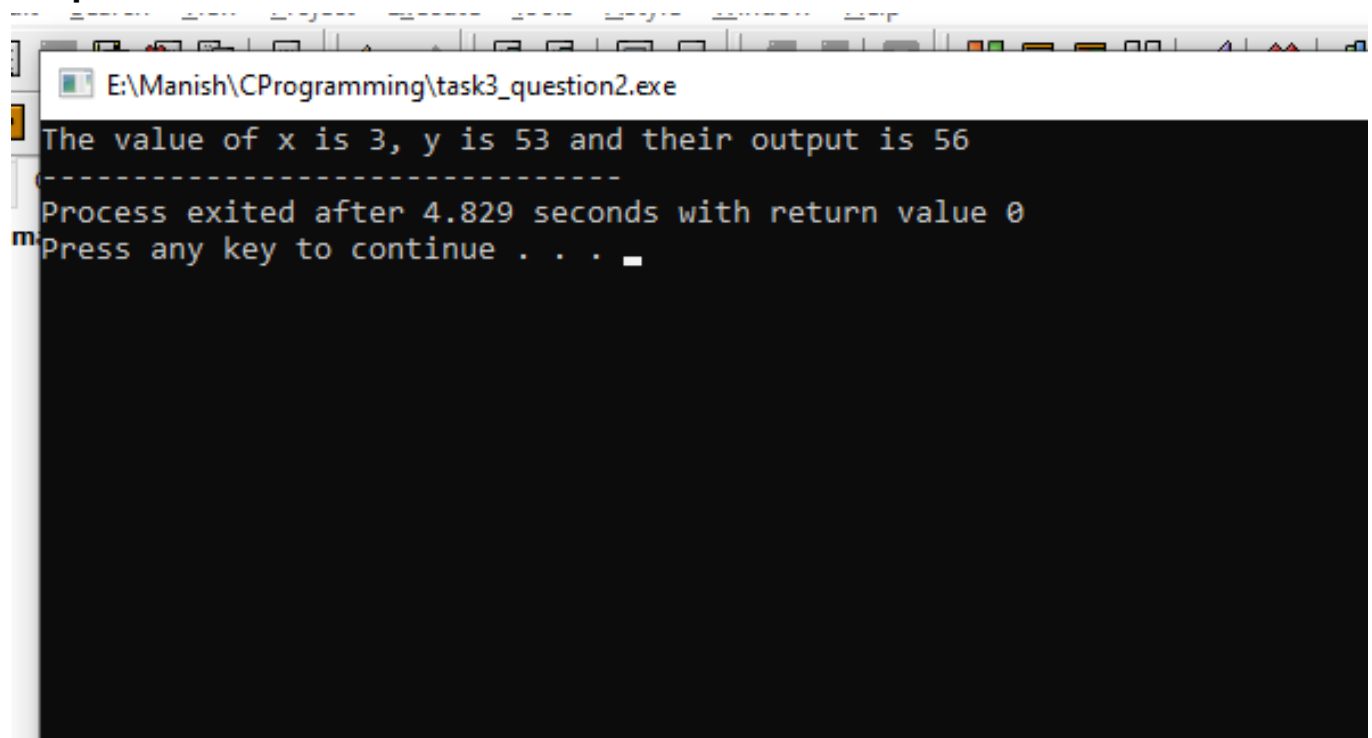

Source Code:

The screenshot shows a code editor window with a tab labeled 'task3_question2.c'. The code is as follows:

```
1 //2. WAP to add two numbers x and y
2 #include <stdio.h>
3 int main()
4 {
5     int x = 3, y=53;
6     printf("The value of x is %d, y is %d and their output is %d", x, y, x+y);
7     return 0;
8 }
```

Output:

The screenshot shows a Windows command prompt window titled 'E:\Manish\CProgramming\task3_question2.exe'. The output of the program is displayed as follows:

```
The value of x is 3, y is 53 and their output is 56
-----
Process exited after 4.829 seconds with return value 0
Press any key to continue . . .
```

3. WAP to subtract two numbers x and y.

Source Code:

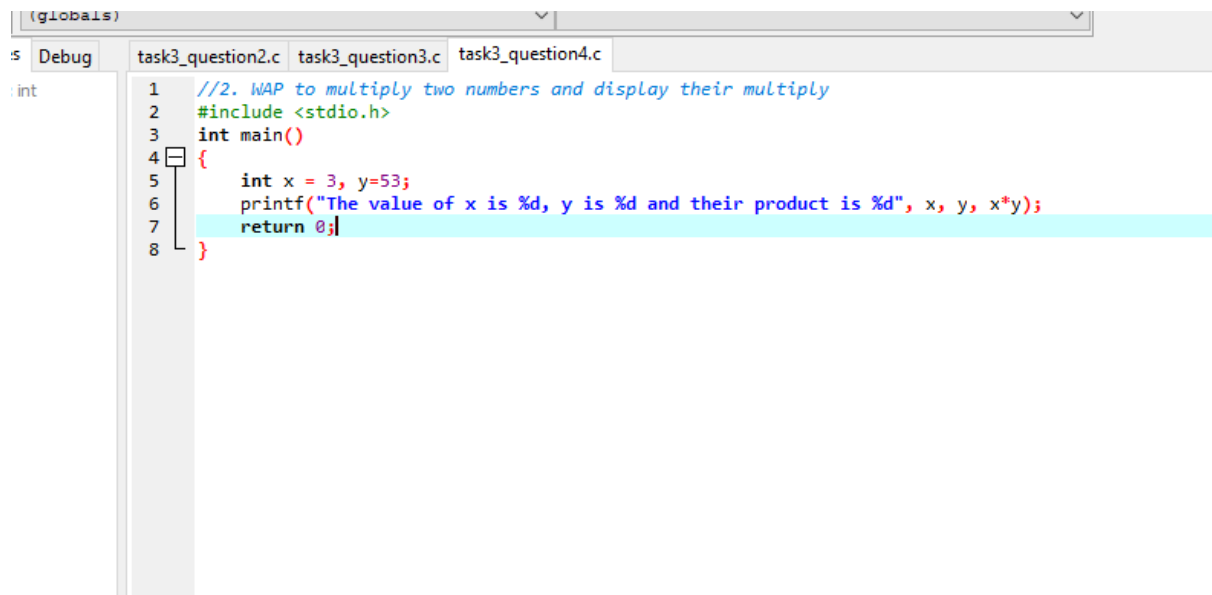

```
Debug task3_question2.c task3_question3.c
1 //3. WAP to subtract two numbers x and y.
2
3 #include <stdio.h>
4 int main()
5 {
6     int x = 45, y = 21;
7     printf("The value of x is %d, y is %d and their output is %d", x, y, x-y);
8     public int __cdecl printf (const char * __restrict__ _Format, ...)
9 }
```

Output:

```
Debug task3_question3.c
1 //3. WAP to subtract two numbers x and y.
2
E:\Manish\CProgramming\task3_question3.exe
The value of x is 45, y is 21 and their output is 24
-----
Process exited after 4.669 seconds with return value 0
Press any key to continue . . .
```

4. WAP to multiply two numbers and display their multiply

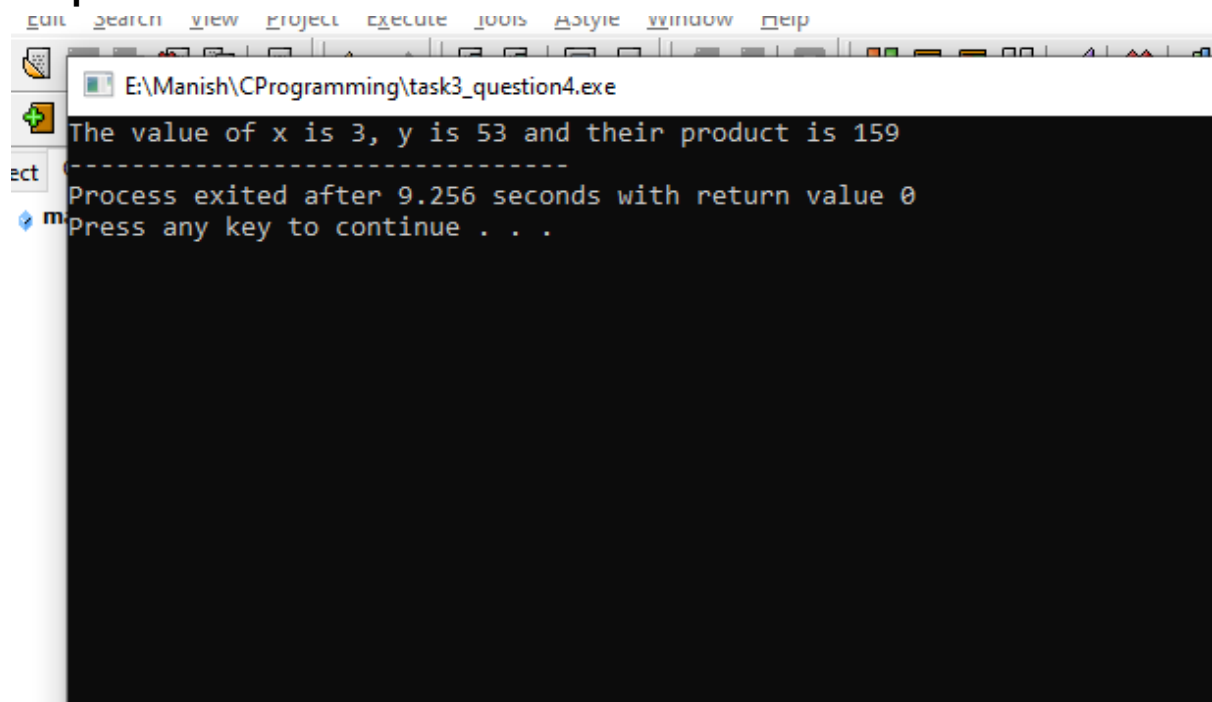

Source Code:

The screenshot shows a code editor with a tab labeled 'task3_question4.c'. The code is as follows:

```
1 //2. NAP to multiply two numbers and display their multiply
2 #include <stdio.h>
3 int main()
4 {
5     int x = 3, y=53;
6     printf("The value of x is %d, y is %d and their product is %d", x, y, x*y);
7     return 0;
8 }
```

Output:

The screenshot shows a Windows command prompt window titled 'E:\Manish\CProgramming\task3_question4.exe'. The output of the program is displayed as follows:

```
The value of x is 3, y is 53 and their product is 159
-----
Process exited after 9.256 seconds with return value 0
Press any key to continue . . .
```
